

Classroom Fire Builder Materials & Directions:

- Create a stone outline for your class campfire to label your class/grade.
- For every \$5 your individual classroom brings for Chapel, add one log or flame to your fire.
- Build the classroom fires in one central school location, if possible, to watch how fast each classroom's fire gets bigger; create a fun incentive to build the biggest campfire in your school! Don't forget to post pics on Camp Luther's Facebook page to win an extra chance for Facebook Live to visit YOUR school!
- Use the picture below as an **example**. Template shapes are provided for you to use with construction paper or to print on white paper and have students color.
